

FileMaker Pro Level 2

Business Course

Tuition: \$625

2 Day Hands-on Course

The FileMaker Training Series is the official training curriculum from FileMaker, Inc. offering 12 training modules that cover a comprehensive set of topics designed to help you master the essentials of FileMaker solution development. This course guides you through modules 5–8.

PREREQUISITES: *Introduction to FileMaker Pro or equivalent knowledge is required for this course.*

WHO SHOULD ATTEND: *This class is aimed at users who want to further their knowledge of FileMaker Development.*

| Topic | Description |
|-----------------------|---|
| Calculation Functions | Learn how functions work in the calculation engine in FileMaker Pro 10 and how to apply them in various contexts. Study how custom functions are built and how to use them in database solutions. |
| Scripts | Explore the new Script Trigger features of FileMaker Pro 10, as well as best practices for writing scripts. Learn how to build navigation and window controls, and study logical branching and looping routines. |
| Reporting | Practice creating reports in FileMaker Pro 10 using a variety of techniques. Explore sub-summary reports that group information by break fields. Learn how to build a cross-tab report (with data-driven columns) and an HTML report that is displayed via the Web viewer object. |
| Security | Study the account-based security features of FileMaker Pro 10 and learn how to implement privilege sets, tie access to database solutions to external authentication servers, control both access and authoring rights to systems, and extend security controls with scripting. |
